Profile

Professional with experience building digital products for international brands, collaborating on feature definition, user journey optimization, and cross-functional work alongside Product, UX, Design, and Engineering teams.

My background combines communication, social sciences, and software development, allowing me to understand problems from the perspectives of users, business goals, and technical feasibility while bringing an analytical mindset to decision-making and continuous improvement.

Professional Experience

Devecoop – Digital Product & Frontend Developer (SSR)

January 2023 – Present

- Developed digital products and promotional platforms for international brands including Danone, Vichy, and Clorox.
- Collaborated with Product, UX, Design, and Engineering teams throughout feature definition and implementation.
- Participated in client meetings to gather requirements and evaluate solutions based on business goals and technical feasibility.
- Analyzed and optimized user journeys to identify friction points and improvement opportunities.
- Prioritized product improvements by balancing user value, business impact, and implementation effort.
- Implemented product features in collaboration with engineering teams, ensuring business requirements were accurately translated into user experiences.

Coderhouse – UX Research Instructor

July 2026 – Present

- Teach UX Research methodologies including user interviews, usability testing, heuristic evaluation, and communicating research insights for digital products.

Amapola Digital – Digital Strategy & Web Development

January 2018 – December 2023

- Designed digital strategies aligned with business objectives.
- Monitored digital metrics, conversion funnels, and audience behavior to identify optimization opportunities.
- Managed SEO, SEM, and Paid Media campaigns focused on performance.
- Developed websites and worked directly with clients to translate business needs into digital solutions.

Coderhouse – Web Development Instructor

March 2021 – February 2023

- Mentored students throughout hands-on web development projects.
- Communicated technical concepts adapted to different learning styles.

Sociopúblico / Comunidad Legal – Web Developer

2021 – 2023

- Developed and maintained websites using WordPress, JavaScript, and SASS.
- Implemented custom features while improving performance and accessibility.
