Professional Profile

Digital product professional with experience in **Product Management, Product Analytics, and UX Research**. I lead the definition, planning, and evolution of digital products and campaigns for international brands, from client needs through launch.
I connect business, users, and technology by defining roadmaps, priorities, and requirements, coordinating with Design, Engineering, and QA teams, and analyzing metrics and friction points to drive improvements.
My background in Marketing and web development provides a comprehensive perspective on business objectives and technical feasibility.

How I Work

- Product discovery, user research, and business objectives gathering.
- Roadmap definition and tracking, scope, features, priorities, and deliverables.
- Direct coordination with clients, Design, Engineering, and QA teams from discovery to launch.
- Customer journeys, funnels, activation, engagement, and friction point identification.
- Functional requirements, business rules, user flows, and acceptance criteria.
- KPI analysis and dashboard development using SQL, Tableau, Power BI, GA4, and GTM.
- Functional validation, issue tracking, performance monitoring, and post-launch iterations.
- Communicating actionable insights to technical and business stakeholders.

Professional Experience

Product Management | Product Analytics & Digital Experiences — Devecoop *(Jan. 2023 – Present)*

- I lead the definition and delivery of digital products and campaigns for brands such as Danone, Vichy, Poett, and Kimberly-Clark, working directly with clients.
- I translate business objectives and user needs into roadmaps, features, business rules, priorities, and requirements for Engineering and Design teams.
- I coordinate project progress and stakeholder alignment, from initial requirements gathering through QA, launch, and product evolution.
- I analyze journeys, funnels, metrics, and customer experience feedback to identify friction points and propose improvements based on impact and feasibility.
- I proposed and implemented dashboards for Danone campaigns, centralizing previously exported data and incorporating weekly insights supported by AI agents.
- I work on multi-market loyalty, gamification, and promotional experiences, considering languages, consent, and data privacy requirements (GDPR).

Co-Founder | Digital Strategy & Project Management — Amapola Digital *(Jan. 2018 – Dec. 2023)*

- Managed end-to-end digital projects, including client relationships, scope definition, planning, priorities, team coordination, and delivery.
- Developed strategies based on market research, audience analysis, competitive benchmarking, Paid Media, SEO/SEM, and digital marketing campaigns.
- Defined tracking and measurement strategies using GTM and Google Analytics; analyzed traffic, conversions, and performance to provide business insights and recommendations.

Web Developer — Sociopúblico / Comunidad Legal *(2021 – 2023)*

- Developed and maintained web products using HTML, CSS, JavaScript, WordPress, Jekyll, and Laravel. This technical background now supports my product decisions and understanding of system integrations.

Selected Projects and Product Decisions

MIND / MINDbot — From Individual Campaigns to a Modular Product

After more than 22 campaigns, we identified recurring patterns involving registrations, QR codes, points, quizzes, rewards, referrals, and validations. I contributed to the evolution of these experiences into a configurable white-label platform, defining user flows, business rules, and metrics alongside Design, Engineering, and Marketing teams. Reusability reduced estimated implementation time from approximately three months to one.

Danacol — Evidence-Based Product and CX Improvements

I identified potential confusion between accumulated and available points. After launch, I validated this hypothesis against customer inquiries received by the CX team and proposed improvements to naming, visual hierarchy, and progress visualization. Following the changes, no further inquiries related to this confusion were recorded. The product reached 33,312 unique users and 910,781 QR interactions.

Danone Dashboards — Data Products and Applied AI

I identified an opportunity to transform campaign data previously accessed through exports into dashboards for monitoring and analysis. I proposed and implemented the solution using AI-assisted development, Codex, and environments configured with specialized skills. I also integrated an AI agent into the weekly insights preparation process, translating technical results into language relevant to Marketing teams and clients.

Kimberly-Clark — Conversational Experience and Efficiency

I defined a streamlined journey for a post-purchase WhatsApp promotion, reducing steps and messages while preserving the necessary purchase receipt validation. Funnel analysis identified receipt uploading as the main friction point. Out of 48,632 journey starts, 32,677 users completed registration (67%), and 19,931 completed participation (41%).

Actimel — Engagement and International Experiences

I contributed to gaming, QR-based, rewards, and validation experiences across different markets. Actimel Super Mario Bros reached 345,326 unique users and 1,622,094 QR interactions. Actimel Pokémon exceeded 1.4 million unique scans in Iberia during its first three months. These are overall product metrics achieved by multidisciplinary teams.

Dercos / Vichy + Dadatina — Brand and Digital Experience

I translated campaign and content objectives into navigation flows, functional requirements, and web experiences, aligning communication needs with technical possibilities to ensure continuity between the campaign and its digital experience.

Research, Insights & Teaching

UX Research Instructor — Coderhouse *(2026 – Present)*

- Teaching problem framing, interviews, usability testing, customer journeys, and insight synthesis to support product decisions.

Advertising Research Professor — ISEC *(2026 – Present)*

- Teaching qualitative and quantitative research, pre- and post-testing, advertising effectiveness, and communication of research findings.

Education

University of Vigo — Master's Degree in SME Management (2025–2026)
Strategy, business management, and innovation. Master's thesis: 10/10.

FLACSO — Postgraduate Studies in Sociology and Political Science (2015–2017)

National Technological University (UTN) — Higher Education Teaching Qualification (2014–2016)

UCES — Bachelor's Degree in Advertising (2009–2013)

Tools and Methods

Product Management: discovery, roadmaps, scope definition, prioritization, stakeholder coordination, Jira, Notion, Figma, Miro.

UX Research: interviews, surveys, customer journeys, usability testing, heuristic evaluation.

Analytics: SQL, MySQL, Tableau, Power BI, GA4, GTM, funnels, KPIs, Excel, Google Sheets.

Technical Background: REST APIs, HTML, CSS/SCSS, JavaScript, Laravel Blade, Django Templates, Git.

Applied AI: Codex, Claude, AI agents, skills, and workflows for development, analysis, and documentation.

Languages

Spanish: Native | **English:** Upper-intermediate (B2) | **Portuguese:** Conversational
